- CSS3, SCSS
- HTML5

Soft Skills

- Teamwork
- Responsibility
- Communication
- Attentive to details

Front-End (React.js) Developer

Valentin Yakubovskiy

Looking for an interesting job as a front-end developer in a good team, where I could use and improve my skills. I'm a fast learner and responsible person, who not afraid to take responsibilities for myself. I haven't commercial experience but I really want to get it! My preferred technology is React.

Team projects

1. [Barbershop](#)

- **Description:** responsive web page for barbershop in Kyiv.
- **Technologies:** HTML5, SCSS, JS, Parcel, Git.
- **Role:** I was a technical director. I added and customized the js-library which make a slider, without javascript knowledge. I supported other developers.

2. [Filmoteka](#)

- **Description:** responsive web application for looking and add films to your library.
- **Technologies:** HTML5, SCSS, JS, Handlebars, REST, Parcel, Git.
- **Role:** I made pagination without any js-library and supported other developers.

3. [QA Test](#)

- **Description:** responsive web application for testing QA engineers.
- **Technologies:** React.js, Node.js, Redux, Mongo DB, REST, WebPack, Git.
- **Role:** I made results page and supported other developers.

Own projects

1. [Web Studio](#)

- **Description:** responsive web page for web studio.
- **Technologies:** HTML5, SCSS.

2. [Movies](#)

- **Description:** web application for looking trending films.
- **Technologies:** React.js, REST, Netlify.

3. [Phonebook](#)

- **Description:** web application for creating your own phonebook.
- **Technologies:** React.js, Redux, Material-UI.
